

Allowable Subject Matter

1. Claims 2-21 are allowed. The following is an examiner's statement of reasons for allowance: The prior art of record fails to sufficiently describe or suggest an apparatus for identifying a vehicle and likely driver comprising: an optical input device; a computer; a database; and a display; wherein the computer receives an image of an approaching vehicles license plate from the optical input device, the computer searches the database and identifies information relevant to the license plate and identifies an expected driver of the vehicle; the computer receives an actual driver image from the same optical input device and compares the actual driver image with a prerecorded image and determines whether the actual image is not substantially similar to the expected driver image for issuance of at least one investigation signal. These along with further limitations set forth by the claims render the application allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
